Enquire and Edit an Existing Discount

Use the Discount Wizard to review and change the parameters for any discount.

Procedure to Enquire and Edit an Existing Discount

Hints and Tips

- ✓ Click to search for a particular discount by description, or leave blank to list all discounts ever created.
 - Click **Search** to start the search.
 - You can click **Contains** to broaden a text search.
 - You can click the **Active Discounts** check box to only list the discounts currently running (the current date falls between the start and end dates of the discount/s).
 - Click the required row, and then click **Select** to return.

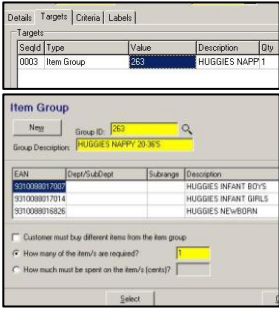

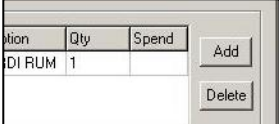

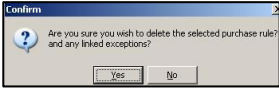

- ✓ Click to delete the discount from the system.
 - You don't usually delete a discount, as it automatically ceases when the end date passes. This way the discount can be re-used at a later time by simply changing the dates.

1.	From the HOS/BOS Tools menu, select Discount Wizard .	
2.	In the Discount ID field, either type or search for the ID code that you want to retrieve.	
3.	Press Enter if you typed the Discount ID .	
4.	Edit the required parameters. <i>*You can edit any parameters.*</i> <i>*Refer to the applicable fact sheet for the rules and guidelines that apply to your type of discount.*</i>	
5.	To view or edit: a target and/or target exception rule	then: click the Targets tab. Go to step 6.
	a criterion or criterion exception	click the Criterion tab. Go to step 6.
	a label (you can only have one label)	click the Labels tab. Refer to the fact sheet. Go to step 7.

Hints and Tips

- ✓ If you delete a target/criterion, the system automatically deletes any respective target exception/criterion exception that was linked to it.
- ✓ An edited discount is automatically updated at POS the next time that system processes run.
 - If it's a HOS discount that's previously been activated, the system change is sent down in the next scheduled file transfer (or immediately if you run it manually).
