Category	Technical
Course	POS Config
Version	1.0
Client	Generic
Software	2.17.0.0

Hints and Tips

✓ This setting only applies to OPOS scanners, as they can return a barcode type.

✓ **Important:** This setting should be disabled if your POS scanners are not handled by OPOS.

✓ The change is sent to the POS when File Transfer next runs; if a HOS user, this occurs after HOS Export/Import next runs.

Configure Accepted Barcode Types

POS can be configured to control which barcode types are accepted by OPOS Scanners.

Procedure to Configure the Accepted Barcode Types

1.	From the HOS/BOS **System** menu, select **Location Setup**.	
2.	If a HOS User, select the Location that you want to define. *You'll be defining the configuration for all stores at and below the level that you select.*	
3.	Double-click **Configure**. *If a HOS user, click Yes to continue.*	
4.	Click the **OPOS** -> **OPOS Scanner** tab.	
5.	Select the **Enable Barcode Type Check** checkbox.	
6.	Use the navigation buttons to move the supported **Barcode Types** into the **Accepted Barcode Types** list.	

7.	Click **Save**.	
8.	Click **Yes** to confirm the save action.	
9.	Click **Close**.
