| Course   | Discount Wizard |
| Version  | 1.1             |
| Client   | Generic         |
| Software | 2.18.5.34       |

## Hints and Tips

- ✓ Use this discount to give customers a percentage off:
  - a specific product
  - a nominated department hierarchy
  - any product in the store
  - a group of specific products.
- ✓ If a customer buys products that are eligible for more than one discount, POS applies an exclusive discount first (page 5), based on the **priority level**.
  - All eligible discounts are calculated off the original price, unless the **Apply on top of price overrides** checkbox is selected (see page 5).

| If the eligible discounts are:           | And the priority levels are: | Then the customer gets:  |
|--|------------------------------|--|
| all exclusive (only one can apply)       | the same                     | only the discount with the lowest discount ID (the oldest one).                          |
| all exclusive                            | different                    | only the discount with the highest priority.   |
| all non-exclusive                        | different or the same        | all eligible discounts.  |
| a mixture of exclusive and non-exclusive | different or the same        | one exclusive discount (depends on priority, as above), and all non-exclusive discounts. |

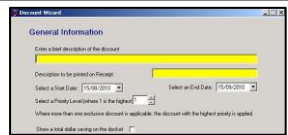

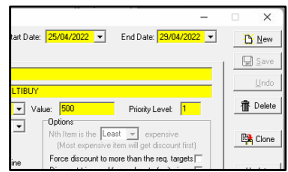

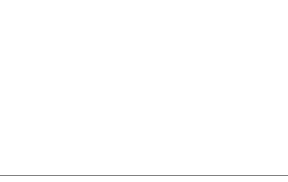

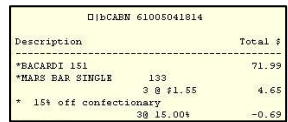

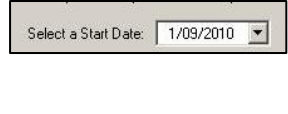

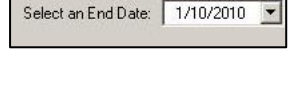

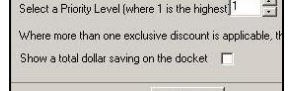

- ✓ Function buttons:
  - **Back:** to check/edit selection/s on the previous screen.
  - **Next:** to go to the next screen.
  - **Cancel:** to cancel the discount.

# Percentage Off Item Discount

Examples of percentage off item discounts:

- 5% off Duck Disinfectant 1L (limit 5 per transaction)
- 20% off all Blackmore's vitamins (a group of items)
- 10% off when you spend \$50 or more on vitamins
- 5% off Coke 2L when you produce a supa saver coupon
- 5% off when you show a staff card (a customer group)
- 15% off Oyster Bay Sav Blanc wine 750ml when you buy a Pepperjack Barossa Shiraz red wine 750ml.

## Procedure to Create a Percentage Off Item Discount

| 1.   | From the HOS/BOS Tools menu, select <b>Discount Wizard</b> .   |    |       |                                |                                  |  |   |   |
|--|--|---|-------|--------------------------------|----------------------------------|--|---|---|
| 2.   | <table border="1"> <tr> <th>To:</th> <th>Then:</th> </tr> <tr> <td>Create a discount from scratch</td> <td>Click <b>New</b>. Go to step 3.</td> </tr> <tr> <td>Use another discount as the base (copy it)</td> <td>Search for and select the discount to see on-screen. Click <b>Clone</b>.<br/>*All details are copied, and the <b>Description</b> now starts with 'CLONE'*<br/>*Click <b>Undo</b> to cancel creation of this discount.*<br/>Edit the discount, i.e. update the description, dates, and items. Go to step 22 to save.</td> </tr> </table> | To:   | Then: | Create a discount from scratch | Click <b>New</b> . Go to step 3. | Use another discount as the base (copy it) | Search for and select the discount to see on-screen. Click <b>Clone</b> .<br>*All details are copied, and the <b>Description</b> now starts with 'CLONE'*<br>*Click <b>Undo</b> to cancel creation of this discount.*<br>Edit the discount, i.e. update the description, dates, and items. Go to step 22 to save. | <br> |
| To:  | Then:  |   |       |                                |                                  |  |   |   |
| Create a discount from scratch             | Click <b>New</b> . Go to step 3.   |   |       |                                |                                  |  |   |   |
| Use another discount as the base (copy it) | Search for and select the discount to see on-screen. Click <b>Clone</b> .<br>*All details are copied, and the <b>Description</b> now starts with 'CLONE'*<br>*Click <b>Undo</b> to cancel creation of this discount.*<br>Edit the discount, i.e. update the description, dates, and items. Go to step 22 to save.  |   |       |                                |                                  |  |   |   |
| 3.   | Type a brief description of the discount.<br>*Maximum 80 characters.*  |  |       |                                |                                  |  |   |   |
| 4.   | Type a description that will print on the customers receipt next to the discount amount (below the target product).<br>*Maximum 30 characters.*  |  |       |                                |                                  |  |   |   |
| 5.   | Select the <b>Start Date</b> that the discount is effective in stores.<br>*Defaults to today's date.*  |  |       |                                |                                  |  |   |   |
| 6.   | Select the <b>End Date</b> for the discount; the last day that customers can get the discount.<br>*Defaults to one month from today's date.*   |  |       |                                |                                  |  |   |   |
| 7.   | Select the <b>Priority Level</b> for this discount.<br>*[1] is the highest priority; set a higher priority for discounts that provide better value for customers.*   |  |       |                                |                                  |  |   |   |

**PRO-3h** Page | 2 of 5

**Hints and Tips**

- ✓ The **Target** defines what product/s gets the discount (step 13), and the unit or dollar quantity that must be bought to trigger the discount (step 14).
  - If you add more than one target, the customer has to buy **every** target (in the right quantity) to get the discount.
  - If you only give the discount **once the customer spends a certain amount**, this is based on the **reduced total** after any higher priority/older eligible item-level discounts/price overrides/AR discounts – this means the discount might not be triggered (e.g. if a multi-buy reduces the total below the minimum spend).

- ✓ The link between targets and criterion (added at step 17):

| If the discount has: | Then the discount is applied:  |
|----------------------|--|
| no criterion         | to every unit bought, if the minimum target quantity is met.<br>E.g. Get 10% off when you buy <b>three</b> (or more) (the minimum) bottles of Coke 2L; the 4 <sup>th</sup> , 5 <sup>th</sup> , 15 <sup>th</sup> ... bottles also get 10% off.  |
| criterion (C)        | only when the target <b>and</b> criterion product/s are <b>both</b> bought in the right multiples.<br>E.g. 50% off <b>one</b> Adidas Roll-on Deodorant 50ml (T) when you buy <b>two</b> Adidas Shower Gel 400ml (C); four gels must be bought to get 50% off a 2 <sup>nd</sup> deodorant.<br><b>Force discount to more than the req. Targets</b> check box (see page 5) overrides this rule. |

- ✓ Use an **Item Group** target if the customer can choose from several products, or a product has multiple EAN/s packaging, and they don't necessarily have to buy every product to get the discount.
  - Refer to the [PRO-3b Item Groups Fact Sheet](#).

| 8.  | Select the <b>Show a total dollar saving...</b> check box if you want the discount & total amount saved to print at the end of the receipt.<br><i>*If a generic savings message has been configured for all receipts, this includes the saving instead.*</i><br><i>*The amount off is also listed under each product.*</i>   |              |       |   |  |   |  |                                       |   |                              |  |                  |
|---|--|--------------|-------|---|--|---|--|---------------------------------------|---|------------------------------|--|------------------|
| 9.  | Click  |              |       |   |  |   |  |                                       |   |                              |  |                  |
| 10.   | In the <b>Select Discount Method</b> field, select <b>Percentage Off Item</b> .  |              |       |   |  |   |  |                                       |   |                              |  |                  |
| 11.   | Type the percentage value of the discount.<br><i>*E.g. enter 5% as 500, 10% as 1000, 50% as 5000.*</i>   |              |       |   |  |   |  |                                       |   |                              |  |                  |
| 12.   | Click  |              |       |   |  |   |  |                                       |   |                              |  |                  |
| 13.   | Select the target that will receive the discount:<br><br><table border="1" style="width: 100%;"> <thead> <tr> <th>To discount:</th> <th>Then:</th> </tr> </thead> <tbody> <tr> <td>a single product (use <b>A Group of Items</b> if there's multiple EANs for the product)</td> <td>select <b>An Item</b>.<br/>Click .<br/>Type or search for the EAN; press <b>Enter</b> if you typed the EAN.<br/>Go to step 14.</td> </tr> <tr> <td>every product in a selected department, sub department or range, <b>or</b> every product store-wide</td> <td>select <b>A Department/Sub department/Range</b>.<br/>Click .<br/>Select the required department tree <b>or</b> select the <b>All products</b> check box.<br/><i>*You can select only the Range to auto-populate the hierarchy above it.*</i><br/>Go to step 14.</td> </tr> <tr> <td>every product in a selected sub-range</td> <td>select <b>A Subrange</b>.<br/>Click .<br/>Select the required sub range.<br/>Go to step 14.</td> </tr> <tr> <td>a specific group of products</td> <td>Select <b>A Group of Items</b>.<br/>Click .<br/>In the <b>Group ID</b> field, type or search for the group; press <b>Enter</b> if you typed the ID.<br/>Go to step 14.</td> </tr> </tbody> </table> | To discount: | Then: | a single product (use <b>A Group of Items</b> if there's multiple EANs for the product) | select <b>An Item</b> .<br>Click .<br>Type or search for the EAN; press <b>Enter</b> if you typed the EAN.<br>Go to step 14. | every product in a selected department, sub department or range, <b>or</b> every product store-wide | select <b>A Department/Sub department/Range</b> .<br>Click .<br>Select the required department tree <b>or</b> select the <b>All products</b> check box.<br><i>*You can select only the Range to auto-populate the hierarchy above it.*</i><br>Go to step 14. | every product in a selected sub-range | select <b>A Subrange</b> .<br>Click .<br>Select the required sub range.<br>Go to step 14. | a specific group of products | Select <b>A Group of Items</b> .<br>Click .<br>In the <b>Group ID</b> field, type or search for the group; press <b>Enter</b> if you typed the ID.<br>Go to step 14. | <br><br><br><br> |
| To discount:  | Then:  |              |       |   |  |   |  |                                       |   |                              |  |                  |
| a single product (use <b>A Group of Items</b> if there's multiple EANs for the product)             | select <b>An Item</b> .<br>Click .<br>Type or search for the EAN; press <b>Enter</b> if you typed the EAN.<br>Go to step 14.   |              |       |   |  |   |  |                                       |   |                              |  |                  |
| every product in a selected department, sub department or range, <b>or</b> every product store-wide | select <b>A Department/Sub department/Range</b> .<br>Click .<br>Select the required department tree <b>or</b> select the <b>All products</b> check box.<br><i>*You can select only the Range to auto-populate the hierarchy above it.*</i><br>Go to step 14.   |              |       |   |  |   |  |                                       |   |                              |  |                  |
| every product in a selected sub-range   | select <b>A Subrange</b> .<br>Click .<br>Select the required sub range.<br>Go to step 14.  |              |       |   |  |   |  |                                       |   |                              |  |                  |
| a specific group of products  | Select <b>A Group of Items</b> .<br>Click .<br>In the <b>Group ID</b> field, type or search for the group; press <b>Enter</b> if you typed the ID.<br>Go to step 14.   |              |       |   |  |   |  |                                       |   |                              |  |                  |

**PRO-3h** Page | 4 of 5

**Hints and Tips**

- ✓ **Target Exceptions** are products in the target (selected in step 13) that won't get the discount; think of it as filtering out products when you've selected a broad target.
  - E.g. 15% off all confectionary (T), **excluding boxed chocolates** (these won't be discounted).
  - Don't use exceptions when the target is a single item, as the only thing to exclude would be that item!
  - Don't use the **...All products** check box; this would cancel out the discount offered!
  
- ✓ **Criterion** is extra conditions that the customers purchase has to meet to get the discount off the target product/s.
  - Refer to the [PRO-3c Adding Criterion Fact Sheet](#) for full instructions to add criterion.
  - E.g. get 0.50¢ off a Dove moisturiser 85gm (T) when you buy a Dove cleanser 1L (C).
  - The criterion isn't always a product; the customer may have to produce a coupon, a customer card, or belong to a certain customer group.
  - Any products used as criterion won't receive the discount if they are also in the target.
  
- ✓ **Criterion Exceptions** are specific products in the criterion group (selected in step 17) that you don't want to be used as criterion; think of it as filtering out products when you've used broad criterion.
  - E.g. 10% off champagne, when you spend \$50 on red or white bottles of wine **excluding magnums** (buying magnum bottles won't count towards the \$50).
  - Don't use exceptions if the criterion is a single item.
  - Don't use the **...All products** check box; this would exclude all the criteria!

16. Complete the following steps to add a target exception:
  - a. On the Options screen, select **Add a Target Exception**.
  - b. Click
  - c. If there's more than one target listed, click the target that will have the exclusion.
  - d. Click
  - e. Select the type of exception.
  - f. Click
  - g. Select the EAN or the category to exclude. *\*Use the same method as selecting the target in step 13.\**
  - h. Click . A summary is displayed; **Exception 1** represents a target exception. \*
  - i. Click
  - j. Return to step 15.
  
17. Complete the following steps to add a criterion:
  - a. On the Options screen, select **Add a Criterion**.
  - b. Click
  - c. Select the type of object that the customer has to purchase or produce.
  - d. Click
  - e. Select the specific product/object required, and the criterion rules *\*See Hints and Tips.\**
  - f. Click
  - g. Return to step 15.
  
18. Complete the following steps to add a criterion exception:
  - a. On the Options screen, select **Add a Criterion Exception**.
  - b. Click
  - c. If there's more than one criterion listed, click the criterion that will have the exclusion.
  - d. Click
  - e. Select the type of exception.
  - f. Click
  - g. Select the EAN or category to exclude. *\*Use the same method as selecting the target in step 13.\**
  - h. Click . A summary is displayed; **Exception 2** represents a criterion exception.
  - i. Click
  - j. Return to step 15.

| No. | Type | Value | Description               | Qty  |

## Hints and Tips

- ✓ **Limit Per Customer** options:
  - **Max Benefit amount:** the maximum saving amount in dollars; the discount stops being applied after this.
  - **Max number of items:** the maximum number of target products that can benefit from the discount; e.g. 'limit 5 per customer/transaction'.
  - **Max number of applications:** not used in this discount.
  
- ✓ **Options check boxes:**
  - **Nth Item is the [x] expensive:** not used in this discount.
  - **Force discount to more than the req. Targets:** only used if your discount has criteria; if selected, the discount will be applied to more than the target quantity specified (in step 14); e.g. '50% off one Adidas Deodorant 50ml when you buy two Adidas Shower Gel 400ml' - if a customer buys 3 gels and 2 deodorants, they'll get 50% off both deodorants (even though a 4th gel wasn't bought; so really the discount is '50% off deodorant if you buy 2 (or more) gels').
  - **Discount triggered for each set of Criteria:** Not used.
  - **Non-exclusive- apply on top of other disnts:** means this discount can be applied to an already discounted product. E.g. two discounts '10% off soft drinks' & '5% off Coke 2L when you produce a coupon'; the customer gets 15% off when they buy coke. An exclusive discount won't apply if another exclusive discount has already been applied to the product.
  - **Apply on top of price overrides:** if selected, this discount will be calculated off the reduced price (resulting from another eligible discount or a manual price override), rather than the original price.
  - **No further discounts (selected discounts):** stops the discount from receiving a staff/% off txn discount set to exclude selected discounts.
